Profile

I'm a passionate 3D game character artist specializing in stylized characters & creatures with strong foundations in anatomy, silhouette design, and production-ready topology. Experienced in shipping commercial titles and building full pipeline characters from concept to in-engine implementation. Passionate about expressive, shape-driven designs that balance artistic clarity with technical precision.

Core Skills

Character & Creature Modeling
Clean Game Topology & Deformation
Character Customization Assets
UV Layout & Texture Painting
Low Poly Optimization
Illustration & Visual Development
Traditional Drawing & Sculpting

Technical Skills

Rigging & Animation
Game Asset Integration
Node-based Shader Creation
Procedural Workflows
Python / MEL Scripting

Soft Skills

Team Collaboration
Clear Communication
Problem Solving
Time Management

Languages

English (Fluent)
Chinese (Native)

Software

Autodesk Maya

Zbrush

Adobe Photoshop

Substance Painter

Substance Designer

Marvelous Designer

Unity

Unreal Engine

Houdini

Work Experience

Freelance

2023 - Present

3D Artist

- Created stylized low-poly characters with strong silhouettes and readable forms
- Delivered full character pipelines from concept refinement to engine-ready assets
- Developed stylized hand-painted and realistic PBR assets for indie projects
- Adapted art styles across projects while maintaining visual consistency

Archosaur Games

Nov 2021 - Dec 2022

3D Character Artist

- Contributed to commercially shipped titles Avatar: Reckoning and Life Makeover
- Built game-ready stylized and realistic characters, including customization assets with LODs
- Maintained clean, deformation-friendly topology for real-time pipelines
- Delivered optimized assets within strict poly and texture budgets
- Collaborated closely with design, rigging, and technical teams to ensure smooth integration

Other Experience

2018 - 2019

3D Artist & Graphic Designer

- Modeled and illustrated a sci-fi Mars station toy line (Wonderfun)
- Designed stylized collectible ring models for 3D printing (Zhiyige)

Projects

Unannounced Stylized Mobile Game (Project Seed)

2021 - 2022

Lead 3D Character & Creature Artist

- Developed a cohesive four-character lineup inspired by graphic, painterly stylization, translating 2D design language into production-ready 3D assets
- Emphasized strong silhouettes, color hierarchy, and hand-painted texture treatment
- Built animation-ready topology and optimized assets with multiple LODs

Independent IP Worldbuilding Project

2020 - Present

Lead 3D Character & Creature Artist

- Designed and built original characters and creatures for a cohesive IP
- Led visual direction and asset creation across multiple media formats

Academic Education

Sheridan College, Canada - Postgraduate Certificates

Interactive Media Management

Sep 2025 - Apr 2026

- Applied UX/UI and responsive design skills in team projects to enhance user experience
- Gained experience with version control, Agile workflows, and cross-functional collaboration
- Strengthened project management and interdisciplinary communication skills

Digital Creature Animation Technical Direction

Sep 2024 - Jun 2025

- Developed characters and creatures from design through full production pipeline
- Gained hands-on experience in texturing, rigging, lighting, and animation integration
- Built strong foundations of anatomy, movement, and structural design
- Scripted custom tools and streamlined workflows for production efficiency

Savannah College of Art and Design, USA

Jan 2018 - May 2021

B.F.A. Animation & Visual Effects (Double Major)

Dean's List Honors Scholarship | GPA: 4.0/4.0

- Trained across full 3D character pipeline from concept development to final production
- Completed advanced coursework in modeling, lighting, and storytelling
- Built strong foundations in traditional drawing, sculpting, and visual design
