Profile

I'm a passionate 3D Character Artist specializing in stylized and realistic game characters with commercial production experience and strong foundations in anatomy, topology, and game-ready workflows. Experienced in translating concept art into game-ready assets while collaborating across multidisciplinary teams. Passionate about building expressive characters that balance artistic quality with technical excellence.

Core Skills

Character Modeling
Clean Game Topology & Deformation
Character Customization Assets
UV Layout & PBR Texture
Low Poly Optimization
Anatomy & Visual Development
Traditional Drawing & Sculpting

Technical Skills

Rigging & Animation
Real-time Production Pipelines
Node-based Shader Creation
Procedural Workflows
Python / MEL Scripting

Soft Skills

Team Collaboration
Clear Communication
Problem Solving
Time Management

Languages

English (Fluent)
Chinese (Native)

Software

Work Experience

Freelance

3D Character Artist

2023 - Present

- Translated 2D concepts and reference images into stylized game-ready characters with clean topology and strong silhouettes.
- Delivered full character pipelines from concept refinement to engine-ready assets.
- Developed stylized hand-painted and realistic PBR character assets.
- Incorporated iterative feedback while matching diverse artistic styles and maintaining visual consistency across projects.

Archosaur Games

3D Character Artist

Nov 2021 - Dec 2022

- Built game-ready stylized and realistic characters for Avatar: Reckoning and Life Makeover.
- Developed character customization assets, modular components, and optimized LODs for production.
- Created garments in Marvelous Designer and integrated them into optimized game-ready character assets.
- Maintained clean, animation-ready topology optimized for deformation in real-time pipelines.
- Delivered optimized assets within strict polycount and texture budgets.
- Collaborated closely with design, rigging, and technical art teams to ensure smooth asset integration.

Academic Education

Sheridan College, Canada - Postgraduate Certificates

Interactive Media Management Digital Design

Sep 2025 - Apr 2026

- Collaborated in Agile team environments using version control and iterative workflows.
- Worked across multidisciplinary teams to deliver interactive digital projects.
- Strengthened communication and project management skills in collaborative production.

Digital Creature Animation Technical Direction

Sep 2024 - Jun 2025

- Developed game-ready characters from concept through production.
- Built strong foundations in anatomy, facial structure, and deformation.
- Gained hands-on experience in sculpting, clean topology, efficient UV layouts, texturing, rigging, and lighting.
- Scripted production tools to streamline technical workflows.

Savannah College of Art and Design, USA

B.F.A. Animation & Visual Effects (Double Major)

Jan 2018 - May 2021

- Completed advanced coursework in character modeling, anatomy, lighting, and storytelling.
- Built strong foundations in anatomy, sculpting, traditional drawing, and visual design.
- Developed a comprehensive understanding of the end-to-end 3D character production pipeline.

Projects

Project Seed – Stylized Game Prototype

2021 - 2022

3D Character Artist

- Contributed to the creation of a cohesive cast of stylized characters for an original mobile game prototype.
- Translated graphic, painterly concept art into production-ready 3D characters with consistent visual language.
- Built animation-ready assets with optimized topology, LODs, and hand-painted textures for real-time production.

Original Character IP

Creator & Lead Character Artist

2020 - Present

- Created and developed an original character-driven fantasy IP focused on storytelling and visual worldbuilding.
- Designed cohesive characters, anatomy, and visual language across the IP.
- Produced game-ready character assets while collaborating with artists across illustration, rigging, and animation.
